## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5 - 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regard to claim 5, it is unclear what provides support for the phrase "interstitial fluid" (line 6). With regard to claim 6, it is unclear what further limitation Applicant intends to set forth. With regard to claim 8, the phrase "said skin penetrant" lacks antecedent basis.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1, 2, and 5 - 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Abraham (WO 97/02811). See page 16 - page 17 and page 28.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

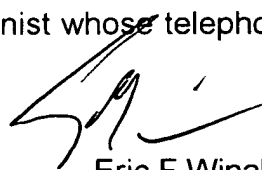

Art Unit: 3736

6. Claims 3, 4, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abraham et al. as applied to claims 1, 2, and 5 - 7 above. Abraham et al. teach all of the features of the claimed invention except the particular combination of carbopol, and propylene glycol as set forth in the claims. Without a showing of unexpected results or criticality, it would have been obvious to one of ordinary skill in the art at the time of the invention to implement the system of Abraham et al. with the gel and flow enhancer set forth in the claims, since Abraham et al. teach that their device can be implemented with carbopol and flow enhancer known to those of skill in the art. It has generally been held to be within the skill level of the art to optimize concentrations of components in a mixture.
